

Correction

Proc. R. Soc. B 275, 2851–2858 (22 December 2008; Published online 26 August 2008) (doi:10.1098/rspb.2008.0783)

Social personality trait and fitness

J. Cote, A. Dreiss and J. Clobert

In table 1 of Cote *et al.* (2008), the table title contains incorrect significance values. The symbols ($^{\#}p < 0.10$, $^*p < 0.05$) in the legend of table 1 did not match with those ($^*p < 0.10$, $^{\#}p < 0.05$) in the table. Thus, all the significant results ($p < 0.05$) appeared non-significant ($p < 0.10$).

It is now presented correctly as:

Table 1. Effects of population density and social tolerance at birth on fitness outcomes (estimates are given for high-density populations $D+$). ($^{\#}p < 0.10$, $^*p < 0.05$.)

| factors | survival | | body growth | | gravity | |
|----------------------------|----------------------|----------------------|----------------------|------------------------|----------------------|-------------------|
| | estimates \pm s.e. | test statistics | estimates \pm s.e. | test statistics | estimates \pm s.e. | test statistics |
| density ($D+$) | 0.39 \pm 0.38 | $F_{1,14} = 1.01$ | -2.04 \pm 0.98 | $F_{1,13} = 4.26^{\#}$ | -0.51 \pm 1.28 | $\chi_1 = 0.16$ |
| social tolerance | -0.001 \pm 0.001 | $F_{1,133} = 0.08$ | 0.003 \pm 0.001 | $F_{1,43} = 5.68^*$ | 0.005 \pm 0.003 | $\chi_1 = 4.05^*$ |
| density \times tolerance | 0.003 \pm 0.001 | $F_{1,133} = 4.01^*$ | -0.003 \pm 0.003 | $F_{1,42} = 1.11$ | -0.07 \pm 0.09 | $\chi_1 = 0.85$ |
| date of birth | 0.027 \pm 0.035 | $F_{1,132} = 0.63$ | -0.13 \pm 0.08 | $F_{1,43} = 3.05^{\#}$ | -0.04 \pm 0.12 | $\chi_1 = 0.12$ |
| body length in May | — | — | — | — | 0.43 \pm 0.21 | $\chi_1 = 5.83^*$ |
